TrueNZ Demo

A large number of Bed & Breakfast hosts in New Zealand use the TrueNZ Bed & Breakfast Guide as a key tool in their marketing kitbab.

Our Guide only carries genuine listings from properties that really do exist. This eliminates the frustrations "bookers" frequently experience with other listing sites that carry old and non existant listings.

Combine that with the prominent place that TrueNZ occupies on the main internet search engines in response to the key international search strings like "new zealand b&b" (try it!) and some of the other unique features of TrueNZ listings, and you get real value for money.

Listing with TrueNZ also gives you access to our proprietary SMART guest management system, the leading edge in online booking and guest management for small accommodation properties.

Our SMART system includes:
An easy to use online reservation system;
Comprehensive channel manager;
Your own secure online "Zip Zap" for taking guest credit card payments.

All for an incredibly low price. Find out more here: www.SMARTgms.co.nz
